Identification guides

Student Invasive
Non-Native Group

Species that has been introduced but
lives alongside native species

Introduced species that
outcompetes native species and
causes problems

Photo and written
description of a species
to allow you to find it
and know what it is

Species that have always
been found in an area

A way of recording what
plants and animals are
in a pond

This is a useful activity to check understanding of the subject both before and after working through the pack. Some words have more than one answer which is aimed at ensuring proper understanding of the terms.
